Computer support is one of the most important components in keeping businesses working productively. By completing the Computer Support program, students will earn a technical certificate and gain the skills necessary to maintain, repair and configure computers and other devices. The curriculum meets the objectives of industry standards including but not limited to CompTIA A+ and Network + certification. It is the student’s responsibility to take certification exams if so desired. The Computer Support program technical certificate is the required first two semester of the Network Systems Technician Associate program. Students must demonstrate computer proficiency by either completing CISA 101 or passing the Computer Skills Assessment exam

Fall Semester Freshman Year

Course Number	Course Title	Pre-Requisite	Credits
CISS 107	Computer Operating Systems		3
CISS 116	Network Technology		3
