This program is designed to prepare students with the knowledge and skills necessary to become an entry-level web developer. As a student in the program, you will learn about web design and development. Upon graduation, students should be able to develop robust, data-driven web sites.

If you are looking for a degree that works with your busy schedule, many of these courses are **available online**.

See Advisor for Program admission procedure. All students in the Web Developer program must demonstrate Computer Literacy proficiency by either completing CISA 101 or by passing the Computer Skills Assessment exam.

Fall Semester Freshman Year

Course Number	Course Title	Pre-Requisite	Credits
CISS 107	Computer Operating Systems		3
